“Orange is the new Green”

By: Ms. Judy Simone
Sr Technical Sales Representative
Biotage. Charlotte, NC

ABSTRACT: This presentation will cover some of the challenges facing Organic Chemists desiring to have a Green approach to the synthetic workflow. Innovative new products can reduce chemical usage and produce results rapidly and reliably. The use of these products and shifting thought processes to a total cost of ownership approach can result in an efficient workflow that is faster, more green, and affordable.

When: FRIDAY November 30, 2018
@ 3pm
(Refreshments: 2:30pm)

Where: Queensborough Community College
222-05 56 Avenue Bayside NY 11361
