“ADVENTURES IN CHEMICAL ARCHITECTURE”

For some years our laboratory has been engaged in the investigation of the syntheses and characteristics of polycationic organic species. These have included quaternary phosphonium and quaternary ammonium salts, which bear both intriguing structural and practical aspects. This presentation is a summary of this work with indications of future directions of practical significance, including medical applications.

11:45 AM COFFEE BREAK. There will be poster presentations by the New York Section Project SEED Students.
