NEW YORK NANOSCIENCE
DISCUSSION GROUP
Tuesday, February 4, 2020
Silver Room 1003
Refreshments: 7:00 p.m.
Science: 7:30 – 9:00 p.m.

New York University
Department of Chemistry
Silver Center
31 Washington Place
New York, NY 10003
Phone: 212-998-8400

Speakers – not necessarily in this order:

**Thomas Reiner**
Memorial Sloan Kettering Cancer Center
Memorial Hospital Research Laboratory Head
*Optoacoustic Imaging with Quenched Nanoformulations*

**Christopher Klug**
United States Naval Research Laboratory
Division of Chemistry
*Magnetic Resonance at the U.S. Naval Research Laboratory*

**Percy Zahl**
Brookhaven National Laboratory
Center for Functional Nanomaterials
*Road to Identify Heteroatom Substitutions in Aromatic Molecules with NC-AFM*

Sessions feature three 30-minute presentations on nanoscience, one each with strong orientation in biology, chemistry, and physics/applied mathematics. Presentations will be focused on discussion of recent work, although speakers will be expected to place the work in a context understandable to a broad audience.
