

Emily A. Carter is the Gerhard R. Andlinger Professor in Energy and the Environment and Professor of Mechanical and Aerospace Engineering, the Andlinger Center for Energy and the Environment, and Applied and Computational Mathematics. She currently serves as a member of the executive management team at the Princeton Plasma Physics Laboratory (PPPL), as Senior Strategic Advisor and Associate Laboratory Director for Applied Materials and Sustainability Sciences. Dr. Carter spent 16 years on the faculty at UCLA before moving to Princeton in 2004, where she spent the next 15 years as a jointly appointed faculty member in mechanical and aerospace engineering, and applied and computational mathematics. She was the Founding Director of the Andlinger Center for Energy and the Environment for six years and Dean of the School of Engineering and Applied Science for three years before being recruited back to UCLA as its Executive Vice Chancellor and Provost, and as Distinguished Professor of Chemical and Biomolecular Engineering. She returned to Princeton and PPPL in 2022 to build new efforts in sustainability science. Among her many honors, she has been elected to the National Academy of Sciences, the American Academy of Arts and Sciences, National Academy of Inventors, the National Academy of Engineering, and the European Academy of Sciences.
